TECHNICAL SKILLS

Languages
JavaScript, PHP, Java, C++, Python

Frontend
HTML, CSS, React, Tailwind CSS

Backend
PHP, Java, Python, REST APIs

Mobile
Android, Android Studio, Java

Database
SQL, Data Modeling, ER Diagrams

Requirements
Elicitation, System Analysis, Documentation

AI & ML
ML Fundamentals, Intelligent Systems

Management
Project Management, Team Leadership, Cost Accounting, Business Analysis

SOFT SKILLS

- Critical Thinking
- Communication
- Problem Solving
- Testing & QA

NEJASH ANWAR YUSUF

Software Engineer

Full-Stack | Frontend | Backend | Mobile App Developer

PROFILE

Software Engineering student (5th year) and Management student (3rd year) who designs, builds, tests and manages complete software solutions, from pixel to production. Full-stack developer with hands-on skills in web and Android development, database design and requirements engineering, backed by a strong focus on quality, clean code and team leadership.

EDUCATION

- **Software Engineering**
  Currently in 5th year
- **Management**
  Currently in 3rd year

WHAT I DO

- **Software Engineer**
  Build complete, end-to-end applications.
- **Mobile App Developer**
  Create Android apps people enjoy using.
- **Database Designer**
  Model data carefully so systems stay fast and reliable.
- **Requirements Engineer**
  Turn real user needs into clear, testable requirements.
- **Project Manager**
  Lead teams, plan sprints and deliver on time.
- **Critical Thinker**
  Break complex problems into simple, elegant solutions.
- **AI & ML Learner**
  Explore intelligent systems and bring them into real software.
- **Quality-Focused**
  Strong believer in testing and clean, maintainable code.

CORE STRENGTHS

Full-Stack Web | **Android Apps** | **SQL & Data Modeling** | **System Analysis** | **Project Management** | **Testing & QA**

Always learning, always building, always blooming.
